

2026 sacrededge Cradle of Life

Profile: Mietta

Mornington Peninsula-based singer-songwriter, Mietta, weaves place, feeling, and community into tender folk storytelling and gatherings. With earthy tones and graceful stage presence, she draws listeners into acoustic soundscapes that invite us to slow down and listen deeply to people, story and place.

Beyond performance, Mietta's contributions extend in service of cross-cultural education, youth co-design and research in education system transformation, exploring how we build, reconcile and restore relationships with each other, with story, and with the living world.

Through music, community gatherings, and documentary storytelling, she creates spaces where the arts become pathways for reconnection, repair and resilience.

Her work asks: How do we slow down enough to truly listen? How do we return our attention to one another and to the lands and waters that sustain us? How do we live and honour our connection to people, story and place?
