## Profile: Saint Ergo

### A Lived Experience Through Song

Stylistically there has always been a desire to combine all the elements of Saint Ergo's work as a songwriter, performer, producer, arranger and engineer with elements of folk, classical, jazz, rock and pop. The common thread has always been about connection and the struggle for relevance as a creative human entity within society.

Saint Ergo is an artists name that Joanna Jones gives to her work and this art is a reflection of the journey of self discovery. A human experience of living with mental illness, neuro-diversity and the euphoria of gender expression. Is this a disability or different ability? If we struggle to be welcomed as a participant in society, does this make us disabled or is society excluding those it deems as unworthy.

As an artist, Saint Ergo was born thinking differently and uses this capacity to challenge the society we live in, to inspire it to be inclusive and find where the differences enhance us all.

Saint Ergo will be bringing a special Soundscape installation as well as her performance to the festival.
